

Shreya Bandyopadhyay (Canadian Citizen)

Business System Analyst - Lead

+18073557741 | shreyab2406@gmail.com | Mississauga, Ontario, L5N 7T9, Canada | [LinkedIn](#)

SUMMARY

Senior Business Systems & Data Analyst with nearly 6 years of experience supporting customer analytics, data warehousing, and enterprise data platform initiatives within the banking sector. Strong background in requirements elicitation, business analysis, data profiling, source-to-target mapping, impact analysis, and UAT support across large-scale data transformation projects. Hands-on expertise with SQL (AWS Redshift, IBM Netezza), Excel, and data warehousing concepts including SCD Type 2, data reconciliation, and data quality validation. Proven ability to translate business requirements into functional specifications and data solutions while collaborating effectively with stakeholders, data engineering, and cross-functional teams.

SKILLS

Business Analytics & Requirements:	Requirements elicitation & documentation, user stories, business process analysis, acceptance criteria, data requirements, gap analysis, stakeholder management.
Data Analytics, Reporting & Data Warehousing:	SQL (AWS Redshift, IBM Netezza, Oracle, MS SQL Server), Python, Advanced Excel, Power BI, Power Platform (Power Apps, Dataverse, Power Automate), data profiling & validation, data reconciliation, source-to-target mapping, SCD Type 2, data modeling, ETL support.
Machine Learning & AI:	NumPy, Pandas, TensorFlow, Scikit-learn, NLTK, PyTorch
Agile Methodologies:	Agile/Scrum, Jira, Confluence, sprint planning, backlog refinement, daily standups, iterative delivery, stakeholder collaboration.
Testing & Quality Assurance:	UAT planning & execution, test case review, defect management, production validation, post-deployment support, audit-ready documentation.
Soft Skills:	Analytical Thinking, Problem Solving, Stakeholder Engagement, Cross-Functional Collaboration, Communication.

PROFESSIONAL EXPERIENCE

System Engineer – Business System Analyst – Lead <i>Tata Consultancy Services (Client: BMO)</i>	Mar'26— Present Toronto, Canada
- Supported the IDP Wealth Data Foundation initiative within the American Customer Analytics division, analyzing 100M+ customer, account, and relationship records to improve household-level segmentation and marketing analytics. - Collaborated with business stakeholders and data engineering teams to gather requirements, define business rules, and create source-to-target mappings for enterprise data warehousing solutions. - Performed complex data analysis, reconciliation, and validation using SQL, AWS Redshift, IBM Netezza, and DBVisualizer, reducing data discrepancies by 35% and improving reporting accuracy. - Supported SCD Type 2 implementations and customer-account relationship tracking within the data warehouse, enabling historical reporting, audit compliance, and enhanced customer insights. - Executed UAT, defect analysis, and impact assessments for data integration enhancements, contributing to a 25% reduction in production issues and achieving 98% data accuracy across reporting workflows	
System Engineer – Data Analyst – Senior <i>Tata Consultancy Services (Client: Citibank)</i>	Oct '25 — Feb'26 Toronto, Canada
- Supporting an Intelligent Document Processing (IDP) initiative by translating business requirements into data mapping rules, validation logic, and acceptance criteria. - Conducting data profiling and reconciliation between source files, extracted datasets, and truth tables, improving data accuracy for model training by about 20%. - Documenting source-to-target mappings, code-value translations, and exception handling rules to ensure consistent downstream processing. - Partnering with AI engineers and platform teams to clarify data dependencies and reduce rework, improving processing efficiency by 25%. - Supporting fraud and risk use cases by identifying data gaps and recommending controls to strengthen data integrity and audit readiness.	

System Engineer – Business Data Analyst	Jun '24 — Sep '25
<i>Tata Consultancy Services (Client: Citibank)</i>	Toronto, Canada
- Worked closely with business users, risk teams, and developers to gather functional and data requirements for banking and capital markets applications. - Performed data validation, reconciliation, and root-cause analysis, reducing data mismatches by 20% and improving overall data accuracy by 15%. - Supported AML and fraud monitoring initiatives by validating data feeds and business rules, contributing to zero audit escalations during the engagement. - Led and coordinated User Acceptance Testing (UAT) by creating test scenarios aligned to requirements, reducing post-release defects by 25%. - Conducted impact and gap analyses for data changes, helping shorten issue resolution timelines by 30%.	
Assistant System Engineer – Business Analyst	Oct '21 — May '24
<i>Tata Consultancy Services (Client: BMO)</i>	Toronto, Canada
- Supported business and product teams by clarifying requirements and data flows across 5+ CRM modules, reducing requirement ambiguity and rework by 20%. - Created test cases, user scenarios, and traceability matrices to validate functional and data requirements across 12+ Agile sprints, achieving 98% requirement coverage. - Identified data and process gaps during testing and partnered with developers to resolve them, improving end-to-end workflow accuracy by 20%. - Assisted in validating production releases and analyzing defects, reducing defect turnaround time by 25%.	
Trainee – Initial Learning Program (ILP)	Aug '21 — Sept '21
<i>Tata Consultancy Services</i>	Toronto, Canada
- Completed TCS Initial Learning Program with training in programming, web technologies, databases, SDLC, and Agile. - Built real-world project simulations, strengthened coding quality and efficiency, and gained teamwork, communication, and client-delivery skills.	
Software Developer (SAP B1 Technical Associate)	Jul '18 — Jun '19
<i>Silver Touch Technologies Ltd.</i>	Ahmedabad, India
- Gathered and analyzed requirements from 6+ business stakeholders to design SAP Business One add-ons for various businesses. - Documented functional requirements, performed system customization, and supported user training and adoption activities. - Designed and implemented SAP Business One add-ons tailored to client business needs, automating manual workflows and improving process efficiency by up to 25%. - Reduced transaction processing times by 15-20% through targeted automation and process redesign.	
Software Engineer Intern	Jan '18 — May '18
<i>Silver Touch Technologies Ltd.</i>	Ahmedabad, India
- Assisted in requirement gathering and implementation of SAP Business One add-ons to streamline business operations. - Partnered with stakeholders to validate 30+ use cases and ensure alignment with business needs. - Helped designing and implementing SAP Business One add-ons tailored to client business needs.	
Front End Development Intern	May '17 — Jun '17
<i>Bhaskaracharya Institute for Space Application and Geoinformatics (BISAG)</i>	Gandhinagar, India
- Built a geospatial web application with CRUD and analytical features, enabling users to customize, visualize, and export maps; increased processing speed for map rendering by 20%. - Gathered and processed over 50 geospatial datasets to improve application accuracy, leading to a more reliable and user-friendly mapping tool.	

EDUCATION

Master of Science in Computer Science (GPA: 85.33/100.0)	Sep '19 — May '21
Lakehead University	Thunder Bay, Canada
Related Coursework: Machine Learning and Neural Networks, Topics in Smart Health Informatics, Natural Language Processing, Big Data, Ethical Issues in Computer Science.	
Bachelor of Technology in Information Technology (GPA: 74.70/100.0)	Aug '14 — Jul '18
Manipal University Jaipur	Jaipur, India
Related Coursework: Data Structures, Big Data Analytics, Artificial Intelligence, Cloud Computing	

CERTIFICATIONS

Microsoft Certified Power BI Data Analyst Associate	Aug '25
Entry Certificate in Business Analysis	Dec '23
Microsoft Certified Azure AI Fundamentals	Oct '21

AWARDS

Star of the Month

Tata Consultancy Services Ltd.

Jun '25

- Awarded “Star of the Month” for client recognition of excellent work, and for contributions to onboarding new team members, earning commendation from senior management.

TCS AI Idea Igniter

Tata Consultancy Services Ltd.

Nov '25

- Recognized for presenting a high-impact AI solution concept and future-scope roadmap for enhancing financial crime detection efficiency; selected as a top idea among company-wide submissions.

ACADEMIC PROJECTS

Misbehavior Detection in VANETs (Machine Learning), Lakehead University

Sep '20 — Apr '21

- Designed and implemented a lightweight tree-based ML model to detect malicious behavior in Vehicular Ad Hoc Networks, achieving 92% detection accuracy.
- Analyzed and compared algorithms including Decision Tree, Random Forest, and Extra Tree Ensemble Classifier, identifying the most efficient model with a 15% faster processing time over baseline methods.

Image Processing on CT Scan Image Dataset, Lakehead University

Jul '20 — Aug '20

- Reprocessed a dataset of over 2,000 CT scan images by resizing, denoising, and segmenting images, improving model readiness and consistency by 25%.
- Applied 2D Convolutional Neural Networks for feature extraction and tested models using K-Nearest Neighbors and Random Forest algorithms, achieving classification accuracy of 88%.

EXTRA CURRICULUM

International Peer Mentor

Lakehead University

Sep '19 — Apr '20

Thunder Bay, Canada

- Mentored 12+ international students from 8 countries, providing guidance on academics and cultural adaptation, contributing to a 95% mentee retention rate in the program.
